

20MM x 102 PGU

Family of
Ammunition

MUNITIONS

MEDIUM CALIBER

General Dynamics Ordnance and Tactical Systems, the developer and producer of this ammunition, and Nammo Raufoss of Norway, developer of the multi-purpose technology, bring together their demonstrated capabilities and resources for the world-wide support and integration of the PGU-27A/B TP, PGU-28A/B SAPHEI (qualified as M70LD in Europe), and PGU-30A/B TP-T.

- » Fully interoperable with all 20mm x 102 gun systems and support handling equipment including the M61, M197 and XM301
- » Type classified and fielded in the F-15, F-16, F/A-18, and AH-1
- » Improved effectiveness offered at a price comparable to the M50 series
- » Provides broad target spectrum capability by combining light-armor and high-explosive features into a single cartridge

PGU-27A/B TP

PGU-30A/B TP-T

PGU-28A/B SAPHEI

**OVERWHELMING IMPROVEMENT
IN EXTERIOR BALLISTICS**

PGU-28A/B SAPHEI

ADVANTAGES

- » The improved A/B version incorporates features that reduce the overall operating pressure and increase the reliability of the gun system
- » Low drag, short time-of-flight
- » Increased velocity and kinetic energy on target
- » Optimum projectile design for enhanced performance and increased lethality on target

- » Delay function combined with larger, more lethal fragments
- » Demonstrated reliability of function at range

The PGU-28A/B utilizes basic multi-purpose technology with enhanced and optimized ballistics to offer substantial improvements in effectiveness over the outdated 20mm M50 series ammunition.
