UTILITIES

# Hazardous Waste Incineration

- ✔ Organic-based wastes from various industrial/manufacturing processes
- ✔ Reactive materials
- ✔ DEA-controlled substances
- ✔ Consumer commodities
- ✔ Household-hazardous wastes
- ✔ Mixed infectious and hazardous waste
- ✔ Ozone-depleting substances (gases)
- ✔ Lab packs
- ✔ Pharmaceuticals
- ✔ Bulk soils, solids, and liquids

# Inorganic Waste Treatment

- ✔ Aqueous treatment of heavy metal bearing wastewaters
- ✔ Encapsulation of heavy metal contaminated debris
- ✔ Stabilization of heavy metals in soils, filtercakes, and sludges
- ✔ Cyanide destruction
- ✔ Neutralization of strong acid and caustic wastes
- ✔ Patented mercury recycling program and reuse of sugar-based liquids

# Hazardous Waste Landfill

- ✓ LDR compliant waste
- ✓ Sediments from dredging
- ✓ Waste treatment residues
- ✓ Remediation soils
- ✓ CAMU eligible wastes
- ✓ PCB remediation wastes
- ✓ Demolition debris
- ✓ Asbestos

# Fuel Blending

Waste-derived fuel is produced by blending of organic materials such as:

- Solids, liquids, sludges, and aerosols
- Many other wastes with energy value including debris and consumer products

This process creates an alternative fuel source that:

- Replaces coal and natural gas in cement kilns
- Supports electricity production at waste-to-energy facilities

# Transportation

- ✔ Fleet includes:
  - ▶ Van, tractor, tank, and end-dump trailers
  - ▶ Roll-offs
  - ▶ Assorted rail cars and containers
  - ▶ Freight brokerage
  - ▶ Barges
- ✔ Multi-year recipient of the U.S. EPA Smartway Excellence Award for Environmental Performance & Leadership, and the CSX Award for Chemical Safety Excellence

# Strategic Disposal Projects

- ✔ Comprehensive logistics support for soil and debris remediation projects and bulk solids
- ✔ Truck and rail to TSD
- ✔ RCRA soil and debris disposal
- ✔ PCB remediation and bulk product waste soil and debris disposal
- ✔ Hazardous waste landfill, incineration, and metals stabilization

# Onsite Resource Personnel

Our Onsite Services and Environmental Assistance program (EAP) put Heritage experts where you most need them.

- ✔ Onsite full- or part-time support:
  - ▶ Day-to-day paperwork and inspections
  - ▶ Labeling material for transport
  - ▶ Creation of waste management reports
- ✔ Tailored environmental assistance
- ✔ Advanced technical/engineering support

# Lab Packing

- ✔ Personnel trained in the “Pack and Pull Program” for safe and compliant lab packing and removal
- ✔ Identify, segregate, pack, and dispose of various items that are in smaller containers
- ✔ Surplus, off-spec, out-of-date / expired, lab waste, and samples
- ✔ Hazardous categorization for unknowns or unlabeled containers

# Industrial Cleaning

- ✓ Vacuum services – DOT spec high
- ✓ Velocity vacuum trucks
- ✓ Hydro-excavation
- ✓ Confined space entry/rescue
- ✓ Hazardous/non-hazardous
- ✓ Chemical removal
- ✓ Pressure washing
- ✓ Hydro-blasting (20-40,000 psi)
- ✓ Container rental
- ✓ Mobile centrifuges
- ✓ Mobile filter press
- ✓ CO2 ice blasting
- ✓ Soda blasting
- ✓ Emergency spill response (OSRO certified)
- ✓ Roll-off and vacuum box rental and transportation
- ✓ Shutdown work
- ✓ Robotic tank cleaning
- ✓ Pain booth cleaning
- ✓ Building decontamination and decommissioning
- ✓ Onsite dewatering
- ✓ Pit, pond, and lagoon cleanout

# Emergency Response

- ✔ Hazardous materials incident response
- ✔ Disaster response
- ✔ Disinfection services
- ✔ Oil Spill Response Organization (OSRO)
- ✔ 24/7 Emergency Response phone line
- ✔ SMART Network

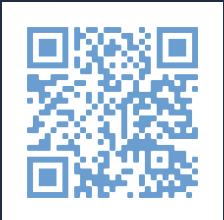

**SMART**  
SPILL MANAGEMENT AND RESPONSE TEAM

 HERITAGE®

# Compliance Training

- ✔ Practical RCRA and DOT Hazmat Training
- ✔ Covers both initial and refresher training to meet qualifications
- ✔ Taught by industry experts
- ✔ Choose from classroom setting or webinar style
- ✔ Sessions offered from February - October
