Characteristic	Inspection/Test Equipment Identification	Inspection and Test Equipment Description

Characteristic	Inspection/Test Equipment Identification	Inspection and Test Equipment Description

Characteristic	Inspection/Test Equipment Identification	Inspection and Test Equipment Description

Is SPC used at this process? If yes, what characteristics are controlled with SPC?

Is SPC used at this process? If yes, what characteristics are controlled with SPC?

Is SPC used at this process? If yes, what characteristics are controlled with SPC?

Are there standard adjustments/changes that are routinely made on this equipment (such as insert changes, tool holder changes, offset adjustments)? If yes, list those changes:

Is there an instruction that tells how the change is verified to produce conforming product after it is made? If yes, list the instruction number and revision level:

Are there standard adjustments/changes that are routinely made on this equipment (such as insert changes, tool holder changes, offset adjustments)? If yes, list those changes:

Is there an instruction that tells how the change is verified to produce conforming product after it is made? If yes, list the instruction number and revision level:
